Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-6, 8, 10-16 and 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Salley 1,727,485 in view of Wilson 3,181,751.

Salley teaches an auto pocket article carrier comprising a planar mounting surface 8, a back panel 2, a front panel forming a plurality of storage compartments 3 and a securing mechanism 7, 22. See also the specification at lines 40-58. Salley however does not teach that the pockets may be formed with an increasing cross-sectional area from their bottoms to their tops. Wilson teaches a similar carrier formed from a back panel and a front panel which forms a plurality of pockets in which the pockets are sewn onto the back panel in a manner in which the cross-sectional area of the pockets increases from

Art Unit: 3727

their bottoms to their tops. See figure 2. Wilson also teaches that pockets sewn to a rear panel may also form more than one row. To form the pockets of Salley in the manner as taught by Wilson to obtain a plurality of rows of pockets with increasing cross-sectional areas would have been obvious to one of ordinary skill in the art to obtain the benefits inherent in the design of Wilson since both inventions teach alternative ways in which pockets may be sewn onto a rear panel.

4. Claims 7 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Salley 1,727,485 in view of Wilson 3,181,751 as applied to claims 1-6, 8, 10-16 and 18-20 above, and further in view of Harnish 5,345,633.

To use an alternative equivalent means for attaching a carrier to a mounting surface such as the hook and loop fasteners taught by Harnish in place of the fastening system taught by Salley would have been an obvious substitution of equivalent means for fastening.

5. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Salley 1,727,485 in view of Wilson 3,181,751 as applied to claims 1-6, 8, 10-16 and 18-20 above, and further in view of Cirigliano 5,653,337.

To vary the height of the pockets of Salley in the manner as taught by Cirigliano to allow the storage and easier retrieval of different size objects would have been obvious to one of ordinary skill in the art.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Telephone inquiries regarding the status of applications or other general questions, by persons entitled to the information, "should be directed to the group clerical personnel and not to the examiners. In as much as the official records and applications are located in the clerical section of the examining groups, the clerical personnel can readily provide status information without contacting the examiners", M.P.E.P. 203.08. The Group clerical receptionist number is (703) 308-1148.

If in receiving this Office Action it is apparent to applicant that certain documents are missing, e.g., copies of references cited, form PTO-1449, form PTO-892, etc., requests for copies of such papers or other general questions should be directed to Tech Center 3700 Customer Service at (703) 308-5648, email CustomerService3700@uspto.gov.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen K. Cronin whose telephone number is 703-308-4296. The examiner can normally be reached on M-TH 7:30am-6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lee W. Young can be reached on 703-308-2572. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9302 for regular communications and 703-872-9303 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1148.

Other helpful telephone numbers are listed for applicant's benefit.
